Choose Mode - 2D or 3D

Mode

2D View is the default map mode, showing a 2D aerial view.

Switch to **3D View** to see the terrain as small hills and valleys.

In 3D View, press the **vertical scale magnifier**, shown below, to increase the exaggeration of the hills and valleys and make them easier to identify.

To change the focal point in 3D View, quickly double-tap a position.
