

Reverting back to a previous version

There is a provision to revert updates if needed. This is not a process that should normally be necessary, or that is recommended to be performed by customers. Please contact T3RRA or your dealer for information about this.

If, however, you want to roll back to an older version because of an error, please first take the time to send a report to T3RRA, via the system. It is extremely helpful to include as much information as possible, such as: what you were doing at the time, what you were trying to achieve, etc. For more information, see the [Troubleshooting section](#).
