View in Google Earth, does not open

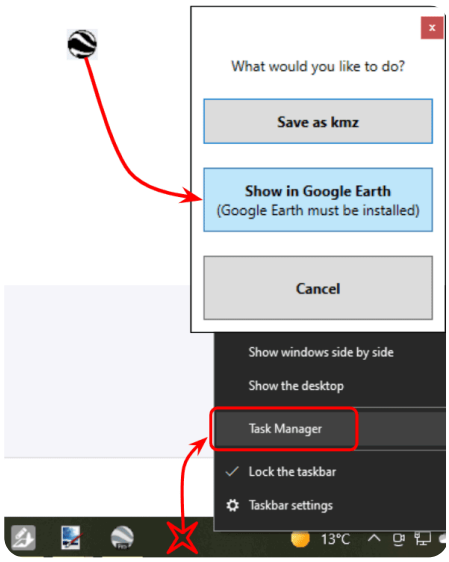

March 2025

Contents

View in Google Earth, does not open

View in Google Earth, does not open

Symptoms:

Clicking the Show in Google Earth button doesn't work.

Opening Google Earth doesn't work either.

Cause:

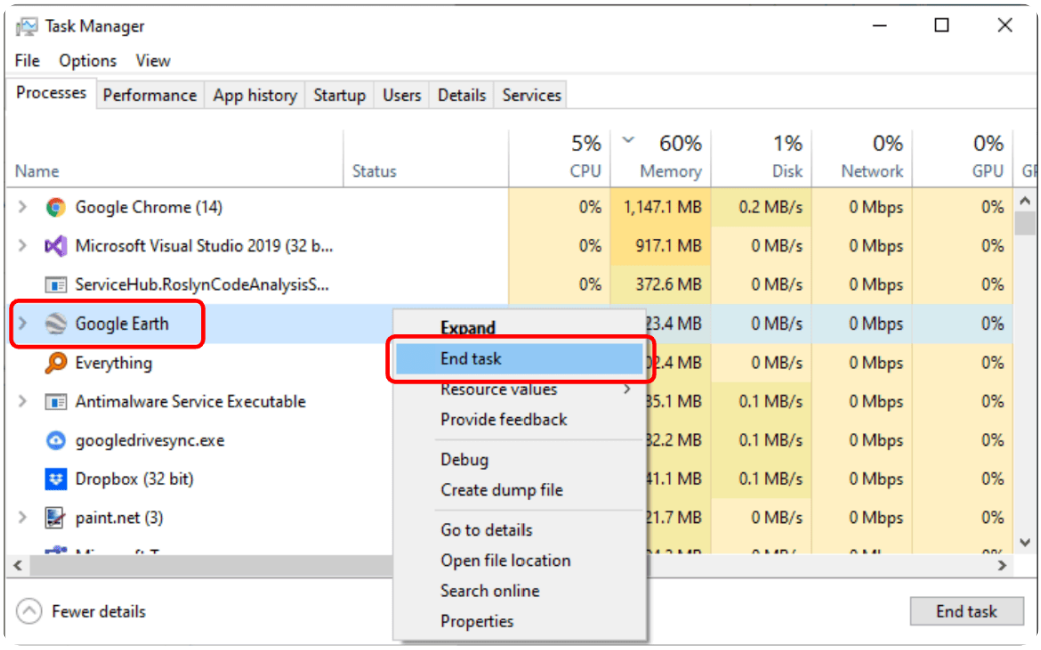

Google Earth has stalled and is not responding.

Solutions:

Restart your computer.

To avoid having to restart your computer, open Task Manager by right-clicking a blank part of the taskbar (usually at the bottom of the screen) and selecting Task Manager.

Then, under the Processes tab, right-click on Google Earth and choose End task. Then Google Earth should start up successfully the next time you try.
