

T3RRA

4.1 | The T3RRA Wizard

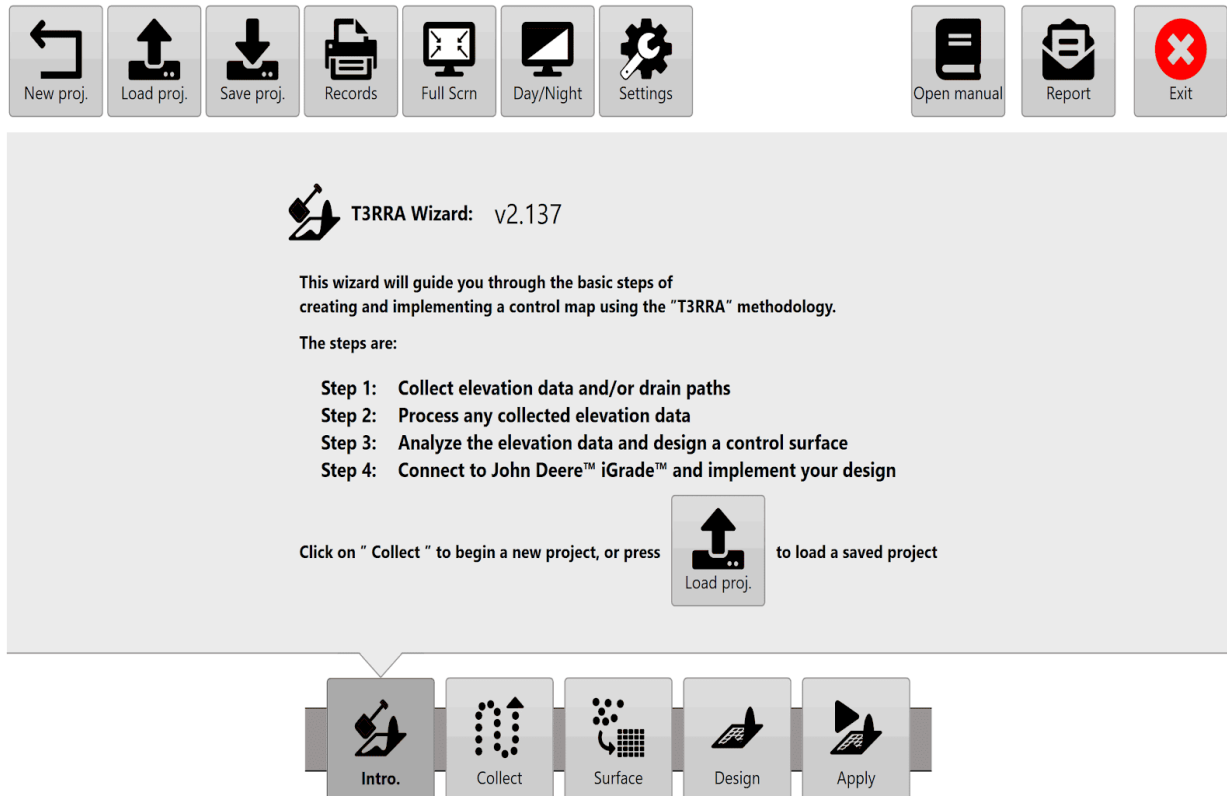

October 2026

Contents

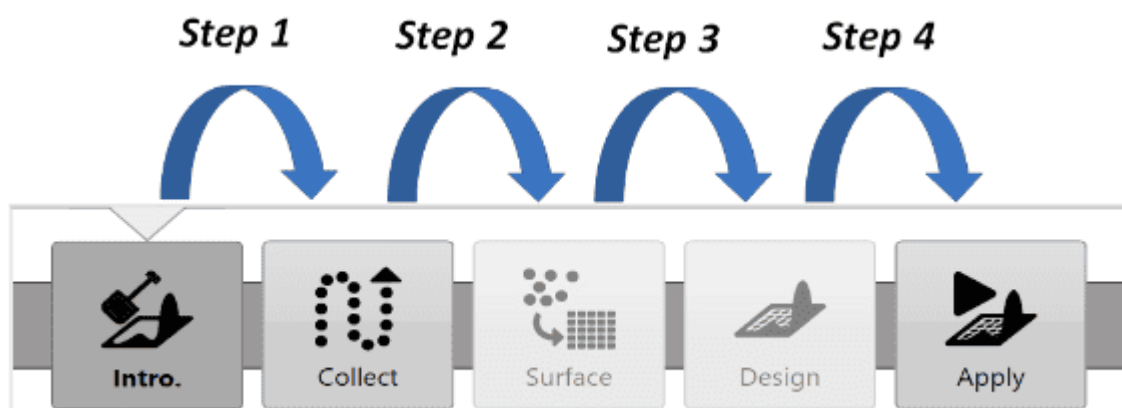

4.1 | The T3RRA Wizard

4.1 | The T3RRA Wizard

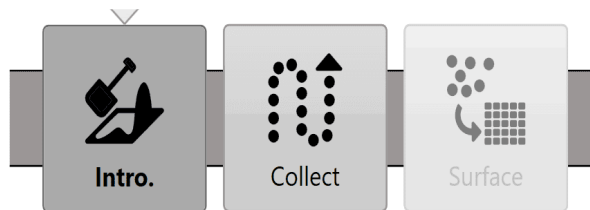

The **‘Wizard’** is home to the primary functions of T3RRA software and the place where you will find the tools used to survey, design, and implement.

The wizard will guide you through the 4 logical steps involved in the T3RRA software process.

If you need to start a new project you are able to return to the '**Main Page/New Project Page**' by pressing the '**New proj.**' button found in the top left corner of all wizard pages.

T3RRA Survey does not have '**Design**' or '**Apply**' (Implementation) wizard steps. Sections in this manual relating to these are not relevant to **T3RRA Survey**.
