

Supported files for Importing

Because T3RRA software normally reads .tci “project” files, external files need to be imported using the 'Import' button on the initial screen. The following files are able to be imported and converted into the tci format.

NOTE: T3RRA Design can be used to convert many other file types for use in T3RRA software

- **Raw elevation points (survey data)**
 - **Drain paths**
 - **.CSV**
 - **.PCTXYZ**
 - **Full field surveys**
 - **.CSV**
 - **.PCTXYZ**
 - **John Deere**
 - **RCD log**
 - **ADAPT log**
 - **SWM Survey**
 - **MyJD Field Operation (Internet required)**
 - **Survey Data**
 - **.KML**
 - **Existing digital elevation models**
 - **JSONGrid**
 - **ESRI ASCII**
 - **Field Level II**

- **AGPS Design File**
 - **Trimble Grid .xyzout format**
 - **Complete control files**
 - **Drain paths**
 - **John Deere Ditch Tracks (SWP Ditch Tracks)**
 - **Full field**
 - **Field Level II**
-
