

The T3RRA Wizard

The 'Wizard' is home to the primary functions of T3RRA software and the place where you will find the tools used to survey, design, and implement.

 T3RRA Wizard: v2.137

This wizard will guide you through the basic steps of creating and implementing a control map using the "T3RRA" methodology.

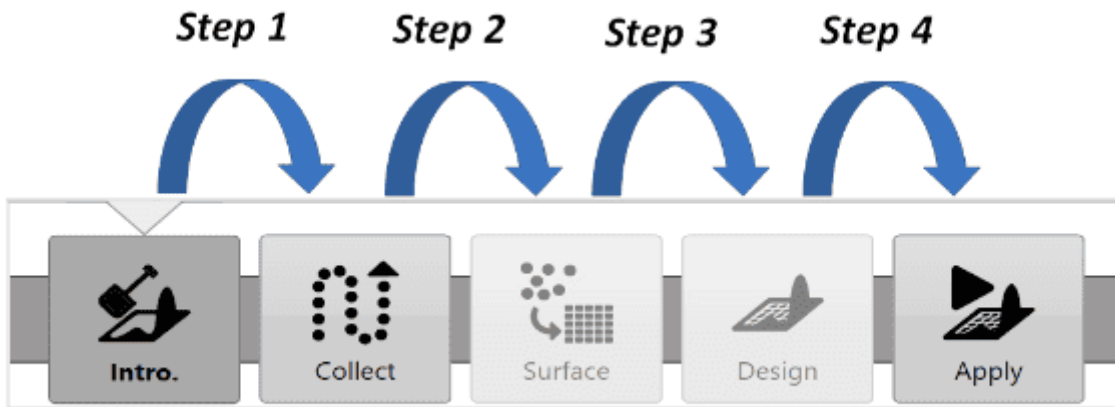

The steps are:

- Step 1: Collect elevation data and/or drain paths
- Step 2: Process any collected elevation data
- Step 3: Analyze the elevation data and design a control surface
- Step 4: Connect to John Deere™ iGrade™ and implement your design

Click on "Collect" to begin a new project, or press  to load a saved project

The wizard will guide you through the 4 logical steps involved in the T3RRA software process.

If you need to start a new project you are able to return to the 'Main Page/New Project Page' by pressing the 'New proj.' button found in the top left corner of all wizard pages.

T3RRA Survey does not have 'Design' or 'Apply' (Implementation) wizard steps. Sections in this manual relating to these are not relevant to T3RRA Survey.
