# Contents

‘As-Applied’ not updating correctly

# ‘As-Applied’ not updating correctly

**Symptoms**:
When on the implementation screen, the “As-Applied” Cut/Fill map was not updating as per pass on the field.

**Cause**:
Ensure the "Implement Width" is entered and they have "As -Applied" enabled.

**Solution**:
If "Implement Width" is entered and "As -Applied" is enabled, make sure you have selected in "View Settings" the "Terrain" As-Applied and "Layer" Cut/Fill maps. If ‘As Applied’ button is unavailable, it is a good indication that As Applied is disabled in Settings.
